About Us

At WellView365 we believe digital signage can improve healthcare services being provided to patients and their families, which in turn increases patient engagement, retention and satisfaction.

What sets us aside from other digital signage firms is that we do all the hard work while you keep all the control. Choose your content from our extensive library or create your own; you’re in charge. With our software you can imbed video and live feeds, update and change your content in real time, and much, much more.
Features and Services

**WellView365** allows you to:

- Create your own content to ensure your message is tailored to your, and your patients’ needs
- Control the content displayed on each screen independently
- Change and update content as frequently as you’d like, without extra fees
- Cross-promote your services
- Improve Practice efficiency
- Educate and engage patients
- Gauge customer satisfaction
- Control up to 85% of broadcast time, the other time going to our Partners and Sponsors

Testimonials

“Our practice loves Wellview. We have 3 offices and the Tvs in the waiting room entertain both parents and kids. The content is really good and we have the ability to edit it to meet our needs. We can’t believe that such service is 100% free.”

-Dr. Trogan, Ivy Pediatrics

 Patients love the information they learn while they’re waiting. We love being able to customize the programming so they get a great mix of general medical information as well as specific information about the practice and updates about policies and events. It gives our waiting room a "cutting edge" look, and patients get the impression we care about their time — although we hope they don’t need to wait long, we at least make the effort to make the waiting time useful and even entertaining. The staff has been great to work with in getting it set up, too.”

-T.Zeug, Tenafly Pediatrics

What We Do

“We love the educational content and info that Wellview provides, as well as the fact that we can cater it to our individual pediatric practice.”

-Dr. Geneslaw, Coastal Healthcare

We install up to 50” flat screens in the waiting rooms of your practice in order to educate, engage, and entertain your patients as they wait. Since we use Android technology, we can provide our digital signage service at a much lower cost than our competitors.

We provide the tools you need to create and control the multimedia content each screen displays, empowering you to control how you communicate with your patients. You can improve your patients’ experience in the waiting room, which will raise patient retention, customer satisfaction, and revenue.

Our software is intuitive and easy to use, and we offer training and webinars to ensure you get the most out of **WellView365**.

Educate and entertain patients in the waiting room to make sure their wait is a pleasant one
